

SALMET®

AGK 3600

high performance enrichable colony system designed for maximum productivity of your birds.

Why choose the AGK system:

- Proven performance for over a decade
- Designed to meet changing regulations
- Optimizes bird numbers when enriched
- Convertible from pre-enriched cage to an enriched cage

... for your success!

AGK 3600

AGK 3600 high performance enriched system designed for maximum productivity and manageability of your birds. The enriched system features a nest with nest mat, scratch pad, perches, claw sharpener and a specially designed floor for smooth egg roll out onto the eggbelt ensuring great quality eggs every day.

Salmets proven push in doors with a double spring system keeps lots of tension on the doors all times so that you never run the risk off them opening. At the end of the flock the entire front of the system opens up for easy bird removal.

The AGK system features over 50 cm in height in the lowest area giving your birds plenty of room to exhibit their natural behaviour. Salmets offers 3 reliable options for egg collection. Eggs are gathered gently and placed on the cross conveyor to the packer via Salmets' Lift system or Malteser elevator; and egg collection table is also possible.

The AGK is suitable for 2 types of feeding system. Traditional chain feeding or our exclusive feed hopper designed to deliver consist feed in front of each bird. The water system is available with stainless steel nipples ensuring excellent water delivery to your birds.

Reliable manure removal

Salmets proven manure drive system is used in the AGK 3600 system giving you reliable manure removal.

About Salmets

Apart from being a manufacturer of poultry equipment, Salmets is also one of the larger egg producers of Germany, so we know what it means to design and produce. *We use what we produce!*

Reliable, durable
and thoroughly tested
poultry equipment.
Proven worldwide since 1962.
