

SALMET®

Manure composting unit

**A direct source
of additional profit.**

Why choose the manure composting unit system:

- Compost improves soil fertility
- Compost supplies a wide range of nutrients
- Compost saves money
- Minimal odour
- Safe & environmental friendly

... for your success!

Manure composting unit

With the Salmet manure composting unit poultry manure is treated and processed properly, and can be used as a valuable organic fertiliser.

The manure composting unit is built on a framework which slowly moves forward on a rail construction. These rails are mounted on concrete walls of 330 cm high. Once the fresh manure is put on the concrete floor of the pit, the composting unit begins passing through the compost lane and it mixes, homogenises, constantly aerates, and moves the manure towards the rear of the lane making room for another deposit of manure. When the composting unit reaches the end of the track, it is shifted to the next lane by means of a simple and effective winch unit.

The procedure of removing, depositing and passing through the compost is repeated in a scheduled cycle that can be altered to a degree depending upon several variables such as no. of birds, manure composition, etc. When this stage is achieved, approximately 40-48 days later, we do not talk anymore about chicken manure, but about compost, a high qualitative natural fertiliser (free from artificial or chemical products), that is odourless and has a moisture content of 15 to 20%. This end product can either be market as it is (in bulk or in retail packs) or further be palletised.

With the Salmet manure composting unit you will have a new direct source of additional profit, because of the possibility to market the manure.

About Salmet

Apart from being a manufacturer of poultry equipment, Salmet GmbH & Co. KG is also one of the larger egg producers in Germany, so we know what it means to design and produce poultry equipment.

We use what we produce!

**Reliable, durable
and thoroughly tested
poultry equipment.
Proven worldwide since 1962.**

SALMET®

Benefits

- **Compost improves soil fertility**
- **Compost supplies a wide range of nutrients**
- **Compost saves money**
- **Minimal odour**
- **Safe & environmental friendly**
