Pitched Roof Mounting Solutions

No matter what your roof type, we have the appropriate flushmount solution for your next project including: asphalt shingle, metal trapezoidal, standing seam, barn roof, or roll on bitumen. All components are stocked and can ship on short notice.

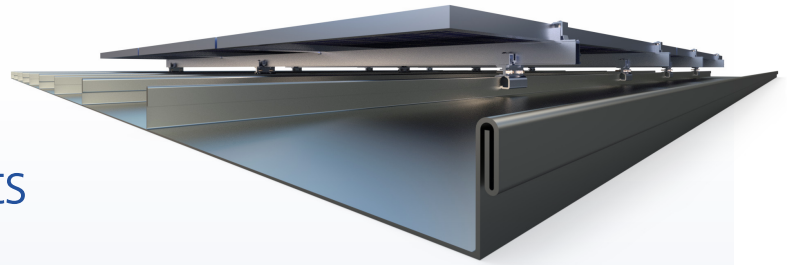

-  1 Adjustable End-Clamp
-  2 Adjustable Mid-Clamp
-  3 Cross Adaptors
-  4 19/66 Top Rail
-  5 Angle Bracket with two T-Bolts
-  6 19/66 Splice with Integrated Bonding
-  7 Standing Seam Clamp
-  8 Connection Rail with TEK Screws and EPDM Tape
-  9 Aluminum Flashing with Angle Bracket, TEK Screw and Rubber Grommet

If you don't see a connection solution for your roof, call us today.

System Features & Benefits

Creative roof attachments / Mitigate roof leaks

- Solutions for every type of roof through angle bracket
- Penetrate through the high rib of your metal profile
- Ensure maximum protection against roof leaks

Click on clamping

- Universal hardware for railed or railless systems
- Universal module mid and end clamps can accommodate 30-50mm frames
- Improve installation efficiencies

Extended service life

- Components that will outlast the PV system
- Extended warranties available

On-site adaptability

- Height adjustments to accommodate roof undulations
- Telescopic bonding splices to maximize use of rail

Standard rail lengths or pre-cut

- We will work with your preference. Do you want a standard rail length? Would you prefer to have all of the rails cut prior to being shipped? Just let us know.

Enhanced engineering drawings

- Detailed structural and construction packages create on-site efficiencies, saving you time and money

Clamp within module greenzones

- Maintain your module warranty
- Reduce micro cracks and accelerated panel degradation
